ECHOCARDIOGRAPHY (JM GARDIN AND AH WALLER, SECTION EDITORS)

What Does 3D Echocardiography Add to 2D Echocardiography in the Assessment of Mitral Regurgitation?

Tadafumi Sugimoto^{1,2} • Raluca Dulgheru^{1,2} • Stella Marchetta^{1,2} • Federica Ilardi^{1,2} •
Laura Contu^{1,2} • Yun Yun Go^{1,2} • Patrizio Lancellotti^{1,2,3}

Table 2 2D and 3D-derived echocardiographic parameters obtainable in MR

Mitral parameters	2D TOE	3D TOE
Annulus		
Intercommissural distance	+	++
Septo-lateral distance	+	++
Perimeter	+	++
Annulus height	–	++
Annulus dynamics	–	++
Leaflets		
Anterior leaflet area	–	++
Posterior leaflet area	–	++
Posterior leaflet angle	+	++
Anterior leaflet angle	+	++
Coaptation depth	+	++
Coaptation indexes	–	++
Leaflet coaptation area	–	++
Tenting area	+	++
Tenting volume	–	++
Interpapillary distance:		
Papillary muscle tip	+	+
Papillary muscle body	+	+
Ventricle		
LV end-diastolic volume	+	++
LV end-systolic volume	+	++
LV dyssynchrony (global/PMs)	+	++
Vena contracta shape	+	+++
PISA shape	+	+++

LV left ventricle, PISA proximal isovelocity surface area, PPM papillary muscle, TOE transoesophageal echocardiography

Comparative Accuracy of Two- and Three-Dimensional Transthoracic and Transesophageal Echocardiography in Identifying Mitral Valve Pathology in Patients Undergoing Mitral Valve Repair: Initial Observations

phen H. Little, MD, Miguel A. Quinones, MD,
Elizabeth L. Herrera, MD, Gerald M. Lawrie, MD,
, MD, *Houston, Texas*

Anatomy of Mitral Valve Navigation

MVN

Controls

QApps

3DQ

Measure distance, area, left ventricular volume, mass, and ejection fraction from a 3D data set.

MVN

Build a model of the mitral valve annulus and assess leaflet segmentation and coaptation line.
